

TABLE OF CONTENTS FOR VOLUME I

Quick Road Map Through This Plan

Executive Summary

Chapter 1. Introduction

Why did we develop this Plan?	1
How will we all benefit from implementation of the Plan?	2
Timeframe for the Plan	3
How was the Plan developed?	4
WRIA 8 Science and Planning	4
WRIA 8 Committees and Participants	4
Steering Committee Proposed Plan: Contents and Recommendations	5
Next Steps for the Plan	7
WRIA 8 Steering Committee Mission and Goals	9
Plan Schedule Approved by Steering Committee	11
References	12

Chapter 2. Plan Implementation Framework

Part 1: Plan Implementation with an Adaptive Management Approach	1
Applying Adaptive Management Principles	1
Elements Necessary for Adaptive Implementation of This Plan	3
Part 2: Organization, Roles, and Responsibilities for Plan Implementation	4
Lessons from other watershed protection and restoration efforts	4
Implementation in WRIA 8: Key Functions	6
Implementation in WRIA 8: A Recommended Organizational Structure and Staffing	10
Part 3: Timeline for Plan Implementation, Monitoring, Reporting & Evaluation	21

Chapter 3. The Science Foundation

What do we know and need to know about salmon and their habitat needs?	1
Scientific Analysis Approach	1
Viable Salmonid Population Framework	1
Watershed Evaluation	2
EDT Modeling	3
WRIA 8 Salmon Populations	4
Cedar River/South Lake Washington Population	6
North Lake Washington Population	10
Issaquah Population	12
Relationship between the WRIA 8 Populations	13
Relationship to Puget Sound Chinook ESU	13
Habitat Conditions in WRIA 8	13
Historical Habitat Conditions	13
Current Habitat Conditions	14
Habitat Limiting Factors	20
Other Factors that Affect Chinook Salmon in WRIA 8	23
Uncertainties about Salmon-Habitat Relationships	25
Other Uncertainties	25
Conclusions/Implications for the Chinook Recovery Plan	25
References	26

Chapter 4. Chinook Conservation Strategy for WRIA 8

Ecosystem Objectives	1
Guiding Principles	1
How Are We Using Science to Guide Effective Actions?	2
Viable Salmonid Population Guidance for WRIA 8	7
Conservation Strategy for Cedar River Chinook	9
VSP Status and Relative Risk for Cedar River Chinook	10
Watershed Evaluation Framework for the Cedar River	11
EDT Habitat Model Results and Recommendations for the Cedar River	12
Habitat Protection and Restoration Hypotheses in the Cedar River	
Chinook Tier 1 Subareas	12
Restoration of Migratory and Rearing Areas for Cedar River Chinook	16
Habitat Protection and Restoration Hypotheses in the Cedar River	
Chinook Tier 2 Subareas	19
Conservation Strategy for North Lake Washington Chinook Population	23
VSP Status and Relative Risk for North Lake Washington Chinook	23
Watershed Evaluation Framework for North Lake Washington.(NLW)	24
EDT Habitat Model Results and Recommendations for NLW Chinook	26
Habitat Protection and Restoration Hypotheses in the NLW Chinook	
Tier 1 Subareas	26
Restoration of Migratory and Rearing Areas for NLW Chinook	31
Habitat Protection and Restoration Hypotheses in the NLW Chinook	
Tier 2 Subareas	33
Conservation Strategy for Issaquah Creek Chinook	37
VSP Status and Relative Risk for Issaquah Creek Chinook	37
Watershed Evaluation Framework for Issaquah Creek Chinook	37
EDT Habitat Model Results and Recommendations for Issaquah Creek	
Chinook	39
Habitat Protection and Restoration Hypotheses in the Issaquah Creek	
Chinook Tier 1 Subareas	39
Issaquah Tier 1 Migratory and Rearing Areas	42
Comparing Areas Used by Multiple Populations	45
Potential WRIA 8 Habitat and Hatchery Scenarios	47
Goals and Objectives for WRIA 8 Habitat and Chinook Populations	50
Summary of the WRIA 8 Conservation Strategy	60
References	64

Chapter 5. Actions to Achieve Our Goals

What actions are needed to achieve our goals for Chinook salmon?	1
WRIA 8 Steering Committee Guidance	2
Summary of Technical Guidance	3
The Comprehensive Action Lists and Start-list	10
Context and Relationship to Other Programs/Processes	14
Additional Opportunities for Collaborative Partnerships	16

Chapter 6. Measures and Monitoring for Gauging Progress

Why do we need monitoring?	1
Who else is working on monitoring?	2
Recommended Parameters and Monitoring Timeframes	5
Implementation Monitoring	6
Direct Effectiveness	7
Cumulative Effectiveness Monitoring	9
Validation Monitoring	13
Coordination of Monitoring Efforts	13

Draft Interim Goals	13
Next Steps	13
References	17

Chapter 7. Funding Strategy

Current Spending on Salmon Recovery in WRIA 8	1
Local Government Spending	2
Federal Funding	3
State Funding	3
Costs of the WRIA 8 Chinook Salmon Plan	5
Options for Future Funding Levels	5
Option One: Base Level	7
Option Two: Base Level Plus 30%	8
Option Three: Base Level Plus 50%	8
Summary Table	9
Options Considered but Not Fully Developed	10
Capacity to Implement the WRIA 8 Plan at Various Funding Levels	10
Funding Challenges and Actions at the Preferred Funding Level	13
Federal Funding	13
State Funding	15
Local/Regional Funding	17
Implement an interim strategy for funding of WRIA 8 efforts	19
Next Steps	19

Chapter 8. Expectations and Commitments for Plan Implementation

Introduction	1
Benefits to Salmon and the Public for Implementing the Plan	2
Expectations for Potential Benefits that Could Be Negotiated with Regulating Agencies	3
Potential Actions to Be Implemented by Non-Local Government Entities	4
Seeking Support from Non-Local Government Entities for Plan Implementation	4
Expectations from Puget Sound Shared Strategy	7
Commitments from Local Governments	7
Next Steps	8
References	9

Chapter 9. Action Start-list

Introduction to Action Start-list	1
Action Start-list for Cedar River Chinook Population	3
Action Start-list for North Lake Washington Chinook Population (Includes Sammamish River)	8
Action Start-list for Issaquah Chinook Population	16
Action Start-list for Migratory Areas (Includes Lakes, Ship Canal, Locks, Estuary/Nearshore) (All Tier 1)	20
Preliminary Cost Estimates of Site Specific Projects and Programmatic Actions	26
